# PENDULUM

*Pendulum Jewellery is characterised by the combination of the raw detail and a soft beautiful play on sophistication.*

Jewellery designer Jeanette Nielsen is the woman behind the Pendulum Collections. In 2006, she created her first jewellery collection, which was characterised by simple and feminine pendulum necklaces, hence the name Pendulum. From the beginning Pendulum has had its own personal and feminine style carrying different beautiful details, a special hook or a specific charm.

Jeanette Nielsen has a passionate love for working with different materials and colours and has mastered to combine them in the best way possible. Raw materials plexiglass, seashell, crocheted leather, rubber, and epoxy arranged with more feminine materials like stones, silk, crystal, ceramics, gold and silver. Her sense for materials, feel for details and feminine style provides the Pendulum Collections with a specific sophisticated and almost poetic look.
